

DIGITAL FLUENCY

Digitally fluent graduates think critically and make balanced judgements as they select and use digital platforms to connect, collaborate, and communicate in academic and professional contexts.

An Effective Way to Develop Digital Fluency:

Getting students to work together on digital tasks, develops subject-specific knowledge as well as how to collaborate and communicate professionally (Sinclair, 2013).

Develop Independent learners who are able to work out a new digital tool/resource via:

Self-Help

Resources

Peer Support

Incorporate ways for students to:

Recognise

Ask students to critically reflect on how they chose a digital technology.

Articulate

Articulate the specific digital capability as a learning outcome.

Record

Focus on engagement with subject knowledge.

Remember:

Not all students might have the access, skills or confidence to use digital technologies.
